Please contact us today to schedule a time to tour our school and discuss employment placement opportunities.

The **Network and Computer Systems Administrator Program** is a training series designed to provide students with the skills and knowledge needed to successfully pursue a career in the Information Technology Industry. Content is cutting-edge technology and culminates in a full 2 week Capstone Project, where a student is required to build an entire network live from the ground up.

Additionally students are well prepared to sit for vendor certification exams including: **CompTIA's A+, Network & security, as well as Microsoft MCSA for both Windows 10 and Server 2012.**

*Each class will meet 5 days per week, Monday thru Friday, either 8:00-11:30 a.m. or 12:30-4:00. p.m.
